

TWENTY-THIRD

ANNUAL ANNOUNCEMENT

OF THE

BELLEVUE HOSPITAL  
MEDICAL COLLEGE

FOOT OF EAST TWENTY-SIXTH STREET, NEW YORK CITY

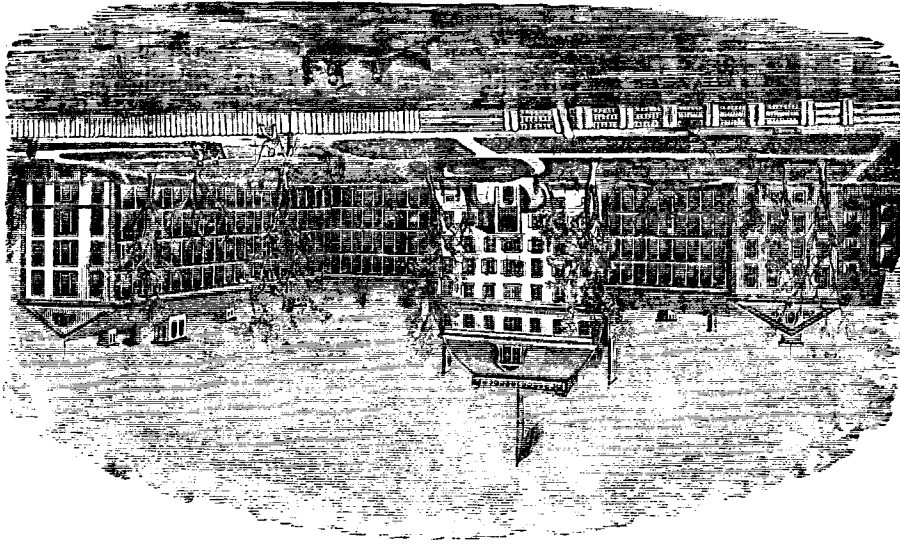

1883-1884

WITH THE LIST OF GRADUATES FOR 1883

The Session begins on Wednesday, September 19, 1883

NEW YORK  
PRINTED FOR THE COLLEGE  
1883

BELLEVUE HOSPITAL,

Foot of East Twenty-sixth Street, New York City.

## The Alumni Association of Bellevue Hospital Medical College

### OFFICERS FOR THE YEAR 1883-1884.

*President* . . . . . FREDERICK A. CASTLE, M.D. (68), *New York City*.  
*Vice-President* . . . . . WILLIAM A. CASTLE, M.D. (68), *New York City*.  
*Recording Secretary* . . . . . WILLIAM VAN SANTVOORD, M.D. (70), *New York City*.  
*Corresponding Secretary* . . . . . RICHARD VAN SANTVOORD, M.D. (70), *New York City*.  
*Treasurer* . . . . . WILLIAM H. KATZENBACH, M.D. (71), *New York City*.  
*Historian* . . . . . FREDERICK A. CASTLE, M.D. (68), *New York City*.

### BOARD OF MANAGERS.

#### TO SERVE UNTIL 1884.

Joseph D. Bryant, M.D. (68), *New York City*. William T. Lusk, M.D. (64), *New York City*.  
 Frank A. Castle, M.D. (68). Robert Newman, M.D. (60).  
 William A. Ewing, M.D. (69). James R. Taylor, M.D. (74).  
 Frederick E. Hyde, M.D. (74). Calvin Terberry, M.D. (73), *Pateron, N. J.*.  
 George R. Kent, M.D. (67), *Newark, N. J.* Richard M. Wyckoff, M.D. (64), *Brooklyn, N. Y.*.

#### TO SERVE UNTIL 1885.

Edward S. Bunker, M.D. (71), *Brooklyn, N. Y.* L. B. Messinger, M.D. (78), *New York City*.  
 Leonard G. Smith, M.D. (71), *New York City*. Wm. C. Wood, M.D. (76), *New York City*.  
 George C. Hartwood, M.D. (73), *New York City*. William W. Varick, M.D. (76), *Newark, N. J.*.  
 Ernest M. Lyon, M.D. (77), *Newark, N. J.* David L. Wallace, M.D. (75), *Newark, N. J.*.  
 Elijah A. Maxwell, M.D. (69), *New York City*. Thomas Wilde, M.D. (66), *Brooklyn, N. Y.*.

#### TO SERVE UNTIL 1886.

George W. Bull, M.D. (72), *New York City*. Charles A. Leale, M.D. (65), *New York City*.  
 Thomas H. Burchard, M.D. (72). Arthur A. Lewis, M.D. (68).  
 William A. Ewing, M.D. (69). Albert H. Smith, M.D. (76).  
 Edward C. Hartwood, M.D. (68). Abram A. Smith, M.D. (71).  
 Arthur M. Jacobus, M.D. (76). Leroy M. Yale, M.D. (66).

#### TO SERVE UNTIL 1887.

W. T. Alexander, M.D. (70), *New York City*. John P. Mann, M.D. (76), *New York City*.  
 Francke H. Bosworth, M.D. (68). Leopold Putzel, M.D. (75).  
 Frederic S. Peckins, M.D. (74). Robert W. Swenson, M.D. (76).  
 William A. Ewing, M.D. (69). Richard Van Santvoord, M.D. (73).  
 Simon N. Leo, M.D. (64). Walter G. Wyler, M.D. (71).

The business of the Association is conducted by a Board of Managers of forty members, one fourth of whom shall be elected for four years at each annual meeting.

Every graduate of the Bellevue Hospital Medical College, in good and regular standing, is considered a member of the Association.

The date and place of the annual meeting will be appointed by the Board of Managers. Special notices of the meetings will be sent to Alumni residing in the city of New York, or in its vicinity.

Communications relating to the Alumni Association only should be directed to the Corresponding Secretary, Robert Newman, M.D., 68 West Thirty-fifth Street, or to the Recording Secretary, R. Van Santvoord, 26 East One Hundred and Twenty-fifth Street, New York City.

N. B.—As the Secretary of the Alumni Association frequently receives letters relating, not to the Association, but to the business of the College, it is proper to state that all such communications should be addressed to the Secretary of the Faculty, Professor Austin Flint, Jr., Bellevue Hospital Medical College, New York City.

## FACULTY.

ISAAC E. TAYLOR, M.D., Emeritus Professor of Obstetrics and Diseases of Women and Children, and President of the Faculty.  
 FORDyce HARKNER, M.D., LL.D., Professor of Clinical Midwifery and Diseases of Women.  
 BENJAMIN W. McCREADY, M.D., Emeritus Professor of Materia Medica and Therapeutics.

AUSTIN FLINT, M.D., LL.D., Professor of the Principles and Practice of Medicine and Clinical Medicine.  
 FREDERIC S. DENNIS, M.D., Professor of the Principles and Practice of Surgery and Clinical Surgery.  
 LEWIS A. SAYRE, M.D., Professor of Orthopedic Surgery and Clinical Surgery.  
 ALEXANDER B. MOTT, M.D., Professor of Clinical and Operative Surgery.  
 WILLIAM T. LUSK, M.D., Professor of Obstetrics and Diseases of Women and Children and Clinical Midwifery.  
 A. A. SMITH, M.D., Professor of Materia Medica and Therapeutics and Clinical Medicine.  
 AUSTIN FLINT, Jr., M.D., Professor of Physiology and Physiological Anatomy and Secretary of the Faculty.  
 JOSEPH D. BRYANT, M.D., Professor of Anatomy and Clinical Surgery and Associate Professor of Orthopedic Surgery.  
 R. GGDEN DOREMUS, M.D., LL.D., Professor of Chemistry and Toxicology.  
 EDWARD G. JANEWAY, M.D., Professor of Diseases of the Nervous System and Clinical Medicine and Associate Professor of Principles and Practice of Medicine.

## PROFESSORS OF SPECIAL DEPARTMENTS.

HENRY D. NOYES, M.D., Professor of Ophthalmology and Otolaryngology.  
 JOHN P. GRAY, M.D., LL.D., Professor of Psychological Medicine and Medical Jurisprudence.  
 WILLIAM H. WELCH, M.D., Professor of Pathological Anatomy and General Pathology and Bacteriology of Anatomy.  
 CHARLES A. DOREMUS, M.D., Ph. D., Professor Adjunct to the Chair of Chemistry and Toxicology.  
 BEVERLY ROBINSON, M.D., Clinical Professor of Medicine.  
 FRANCIS F. BRISWORTH, M.D., Professor of Diseases of the Throat.  
 J. L. KINGSLEY, M.D., Ph. D., Professor of Diseases of the Eye.  
 Assistant Demonstrators of Anatomy.  
 Rev. ALFRED B. BEACH, D.D., Chaplain of the College.  
 WILLIAM H. FLINT, M.D., Assistant to the Chair of Principles and Practice of Medicine.  
 LEWIS HALLI SAYRE, M.D., Assistant to the Chair of Orthopedic Surgery.  
 JAMES R. TAYLOR, M.D., VALENTINE MOTT, M.D., Assistants to the Chair of Clinical and Operative Surgery.  
 WILLIAM B. ANDERTON, M.D., BUCHANAN BURK, M.D., Assistants to the Chair of Obstetrics.  
 RICHARD ALISHI, M.D., Assistant to the Chair of Materia Medica and Therapeutics.  
 CHARLES F. ROBERTS, M.D., J. A. TEN EYCK, JR., M.D., Assistants to the Chair of Physiology.  
 A. H. DOTY, M.D., C. G. BULL, M.D., S. H. PINKERTON, M.D., Prosectors to the Chair of Anatomy.  
 M. D., GASPAR GRISWOLD, M.D., Assistants to the Chair of Diseases of the Nervous System.  
 W. F. MITTENDOERF, M.D., H. S. OPPENHEIMER, M.D., Assistants to the Chair of Ophthalmology.  
 LEGRAND N. DENSLAW, M.D., Assistant to the Chair of Cutaneous Diseases.  
 HENRY D. CHAPIN, M.D., Assistant to the Chair of Diseases of Children.

JOSEPH V. STANDISH, JANITOR.

The standard of Medical Ethics recognized by the College is embodied in the Code of Ethics of the American Medical Association.

**TRUSTEES.**

Communications relating to the business of the College should be addressed, not to the Secretary of the Board of Trustees, but to the Secretary of the Faculty.

Professor AUSTIN FLINT, JR.,  
BELLEVUE HOSPITAL MEDICAL COLLEGE,  
*New York City.*

**ANNOUNCEMENT**

OF THE

**TWENTY-THIRD ANNUAL COURSE  
OF INSTRUCTION.**

**SESSIONS OF 1883-84.**

**T**HE Collegiate year embraces a Winter Session and a Spring Session. The Winter Session for 1883-84 will begin on Wednesday, September 19, 1883, and close in the latter part of March, 1884. The recitations, lectures, and clinics for the Spring Session will begin in the latter part of March, 1884, and end about the middle of June. As heretofore, attendance during the Winter Session is alone required for graduation. During the Spring Session, lectures upon special subjects are given by a corps of lecturers appointed by the Faculty. These lectures are free to those who have matriculated for the Spring and the following Winter Sessions.

**WINTER SESSION.**

During the Regular Term, or Winter Session, there are generally four didactic lectures and two or more clinical lectures on every weekday. All the lectures are given either in the Amphitheatre of the BELLEVUE HOSPITAL or in the Lecture-Room of the College building situated within the Hospital grounds. During this Session, there is a vacation from December 25th to January 1st, inclusive, and there are no lectures on Thanksgiving-Day and the Friday and Saturday following, February 22d, and Election-Day.

The regular curriculum of instruction embraces the following didactic and clinical lectures in the several departments :

#### DIDACTIC LECTURES.

*Principles and Practice of Medicine.*—Professor FLINT and Associate Professor JANEWAY. This course consists of three lectures a week throughout the Term.

The Principles of Medicine are considered in connection with individual diseases; and the latter are treated of with special reference to their practical relations to prophylaxis, diagnosis, and management. As far as practicable, cases exemplifying the diseases treated of in the didactic course are, at nearly the same time, presented to the class in connection with clinical lectures in BELLEVUE HOSPITAL.

Professor FLINT will lecture on the Diseases of the Respiratory System, Diseases of the Heart, and Diseases of the Digestive System. Professor JANEWAY will lecture on Fevers.

*Diseases of the Nervous System.*—Professor JANEWAY. Professor JANEWAY gives one lecture a week throughout the Term on Diseases of the Nervous System. These diseases are illustrated by cases in the Lecture-Room, as well as by those introduced in connection with the clinical course at BELLEVUE HOSPITAL.

*Public Hygiene.*—The subject of Public Hygiene has been assigned to Professor JANEWAY, as Associate Professor of the Principles and Practice of Medicine.

*Psychological Medicine and Medical Jurisprudence.*—Professor GRAY. The lectures on these subjects, by Professor GRAY, are illustrated by cases brought before the class from the Asylums under the charge of the Commissioners of Public Charities and Correction. The hours of these lectures will be duly announced during the Session.

*Principles and Practice of Surgery.*—Professor DENNIS. Three lectures a week are given throughout the Term on the subjects embraced in this department, including the Principles and Practice of Surgery and General Surgery.

*Orthopedic Surgery.*—Professor SAYRE and Associate Professor BRYANT. One lecture a week is given in this department by Professor SAYRE or Professor BRYANT. The didactic course is fully illustrated by cases and the application of dressings and apparatus.

*Cutaneous and Genito-Urinary Diseases.*—Professor KEYES. One lecture a week throughout the term is given by Professor KEYES on Dermatology and Diseases of the Genito-Urinary System.

*Obstetrics and Diseases of Women and Children.*—Professor LUSK. The course on these subjects embraces three lectures a week throughout the Term. The lectures on Obstetrics are illustrated by models, plates, and prepared specimens. Diseases of Women are illustrated by cases in connection with the clinical course in BELLEVUE HOSPITAL.

*Materia Medica and Therapeutics.*—Professor A. A. SMITH. Two lectures a week throughout the Term are given in this department. The botanical and physical characters of drugs and their chemical constitution form a relatively small proportion of the topics considered in this course. The larger part of the course is devoted to General Therapeutics, the *modus operandi* of remedies, and the rules which should govern their employment in the treatment of diseases.

*Physiology and Physiological Anatomy.*—Professor FLINT, Jr. Three lectures a week throughout the Term are given in this department. Physiological functions and processes are illustrated by operations on living animals. The lectures include Anatomical descriptions in so far as these are involved in the study of Physiology.

*Anatomy.*—Professor BRYANT. Professor BRYANT gives three didactic lectures a week on Anatomy throughout the Term. The lectures are illustrated by recent dissections, by anatomical preparations, and by models and drawings. The relations of Anatomy to Surgical Operations receive special consideration.

*Chemistry and Toxicology.*—Professor DOREMUS. The regular course in this department embraces three lectures a week throughout the Term. The relations of Chemistry to Etiology, to the diagnosis of diseases and to Medico-Legal questions are fully considered. The chemical examination of the urine receives special attention. Toxicology also forms an important part of the course.

*Ophthalmology and Otology.*—Professor NOYES. One lecture a week throughout the Term is assigned to these subjects. The course is illustrated by cases, operations performed before the class, and by models, drawings, and demonstrations with the magic lantern.

*Pathological Anatomy and General Pathology.*—Professor WELCH. One lecture a week throughout the Term is given on this branch of Medicine by Professor WELCH. The course embraces Pathological

Histology, as well as the gross appearances of diseased organs, and the consideration of topics belonging to General Pathology. The lectures are fully illustrated by fresh pathological specimens. *Post-mortem* examinations are made before the class, and students have access to the Autopsy-Rooms of BELLEVUE HOSPITAL, where *post-mortem* examinations are made under the direction of the Curators of the "Wood Museum." Members of the class have opportunities for attending Coroners' inquests in Hospital cases and on bodies brought to the Morgue.

#### CLINICAL LECTURES.

*Practice of Medicine.*—Professor FLINT gives two clinical lectures a week in the BELLEVUE HOSPITAL from the beginning of the Term until January 1st, and one lecture a week after January 1st.

In connection with these lectures, practical instruction is given to third-course students by forming two classes; namely, a diagnosis class and a clinical class. The diagnosis class is divided into sections, a section consisting of four members. A patient is assigned to a section, ample time and facilities being allowed for an examination of the case. An oral or written report of the diagnosis and treatment is then made by each member of the section, in the Hospital Amphitheatre, in presence of the class, and the members are severally questioned concerning points that are suggested in connection with the case. The clinical class is divided into sections of fifteen members each, and cases are examined by each member of a section under the direction of the Professor or of his Clinical Assistant. These practical exercises have proved highly attractive and useful. Candidates for graduation who are not third-course students participate in them as far as practicable.

Professor JANEWAY gives one clinical lecture a week in the BELLEVUE HOSPITAL throughout the Term. Special attention in this course is given to cases illustrative of Diseases of the Nervous System. Professor JANEWAY will also connect with his clinical lectures practical exercises in Diagnosis, giving to members of sections of the graduating class, individually, the opportunity of examining patients.

Professor A. A. SMITH gives one clinical lecture a week in the BELLEVUE HOSPITAL from January 1st until the close of the Session.

Special attention in these lectures is devoted to the application of the therapeutical principles in the cases brought before the class.

Professor BEVERLY ROBINSON gives one clinical lecture a week in the College Lecture-Room during the months of September and October.

Professor FRANCIS H. BOSWORTH gives one clinical lecture a week in the College Lecture-Room, during the months of November and December, on Diseases of the Throat. Cases illustrative of these diseases are furnished by the BUREAU OF MEDICAL AND SURGICAL RELIEF FOR OUT-DOOR POOR, in the College building. The number of cases treated in the department of the Bureau allotted to these diseases is probably larger than in any Dispensary or Public Institution in this country.

*Surgery.*—Professor DENNIS gives one clinical lecture a week in BELLEVUE HOSPITAL during the months of September and October; Professor KEYES, one lecture a week during November and December; and Professor BRYANT, one lecture a week during January, February, and March. All the larger and more difficult operations in Surgery are performed, in connection with these lectures, before the class.

Professor DENNIS gives one clinical lecture a week in the College Lecture-Room during the months of January, February, and March. Surgical operations are performed in connection with these lectures, and cases are presented in illustration of the treatment of Surgical diseases.

Professor SAYRE or Professor BRYANT gives one clinical lecture a week throughout the Term, in BELLEVUE HOSPITAL. Cases in Orthopedic Surgery receive special attention in these lectures. Prof. SAYRE's private practice furnishes a large number of cases in addition to those in the Hospital.

Professor MORT gives one clinical lecture a week in the College Lecture-Room. Surgical cases and operations form the basis of these lectures. The lectures are supplemented with operations on the cadaver, performed by members of the graduating class.

Professor KEYES gives one lecture a week in the College Lecture-Room. These lectures relate largely to Diseases of the Genito-Urinary System, including Syphilis. Of the latter disease, cases illustrative of all its various phases and manifestations will be presented to

the class, a large number of such cases being available from the wards of the CHARITY HOSPITAL. A part of the course is devoted to Diseases of the Skin. Cases, in abundance, illustrating these diseases, are furnished by the BUREAU OF MEDICAL AND SURGICAL RELIEF FOR OUT-DOOR POOR, in the College building.

*Diseases of Women and Children.*—Professor LUSK gives one clinical lecture a week in BELLEVUE HOSPITAL throughout the Term. The diagnosis and the treatment of uterine and other diseases peculiar to women are amply illustrated by Hospital cases. Most of the important operations in Gynecology are performed during the Session. Practical exercises are conducted by the Professor, and cases are examined by members of the graduating class, divided into sections of convenient size.

Professor J. LEWIS SMITH gives one clinical lecture a week, from December 1st to the end of the Term, in the College Lecture-Room, on Diseases of Children. Cases in great abundance illustrative of these diseases are furnished by the BUREAU OF MEDICAL AND SURGICAL RELIEF FOR OUT-DOOR POOR, in the College building.

*Ophthalmology and Otology.*—The lectures by Professor NOYES include operations and the presentation of cases illustrative of the Diseases of the Eye and Ear. In addition, members of the graduating class receive practical instruction in the use of the ophthalmoscope and in examinations of the ear, in the BUREAU OF MEDICAL AND SURGICAL RELIEF FOR OUT-DOOR POOR, under the direction of Drs. MITTENDORF and OPPENHEIMER, Assistants to the Chair of Ophthalmology and Otology.

#### RESOURCES FOR CLINICAL INSTRUCTION.

BELLEVUE HOSPITAL receives annually from five to six thousand patients. Medical and Surgical cases of all descriptions are admitted, exclusive of contagious diseases. Cases of typhus, scarlatina, and other acute diseases which are directly communicable, are transferred to the FEVER HOSPITAL on Blackwell's Island.

The CHARITY HOSPITAL on Blackwell's Island receives annually from eight to ten thousand patients. A considerable number of the patients admitted into this Hospital are affected with Venereal Diseases.

The BUREAU OF MEDICAL AND SURGICAL RELIEF FOR OUT-DOOR

POOR is in the College building and furnishes most of the cases for the clinics held in the College Lecture-Room. The total number of cases treated in this department during the year is about 36,000. The number of new cases in the class of Diseases of the Digestive System, in 1882, was 6,990; Diseases of the Chest, 6,783; General Surgery, 4,371; Orthopedic Surgery, 188; Genito-Urinary Diseases, 2,914; Eye and Ear, 1,800; Diseases of Women, 1,912; Nervous Diseases, 861; Diseases of Children, 8,618; Diseases of the Skin, 1,362; Diseases of the Throat, 3,002.

Other Hospitals and Dispensaries offer large opportunities for clinical instruction. The amount of clinical material which is available to students of the College is so great, that the difficulty is to find a sufficient number of vacant hours for its utilization.

#### DISSECTION.

The dissecting-room is open every evening, except on Saturdays and Sundays, throughout the Term. The dissections are made under the immediate direction of Professor WILLIAM H. WELCH, Demonstrator of Anatomy, and the Assistant Demonstrators. Students are assigned to parts of subjects by the Demonstrator in the order in which their names appear on the Dissection-Book, five students being assigned to each subject. Students are expected to dissect all the parts of a subject during the Term. This constitutes a full course of dissections, which is certified to by the Demonstrator at the close of the Session. During the Session, students are assigned three or more times, and each time, to a different part of a subject.

#### EXAMINATIONS BY THE FACULTY DURING THE SESSION.

During the Winter Session, regular weekly examinations are held by members of the Faculty, upon the subjects of the lectures, as follows:

*Practice of Medicine*, Profs. FLINT and JANEWAY; *Surgery*, Prof. DENNIS; *Obstetrics*, Prof. LUSK; *Materia Medica and Therapeutics*, Prof. A. A. SMITH; *Physiology*, Prof. FLINT, Jr.; *Anatomy*, Prof. BRYANT; *Chemistry*, Prof. DOREMUS.

These examinations are free. They are confined to those who expect to become candidates for examination at the close of the Session, but all members of the class are invited to be present.

**SPECIAL PRACTICAL INSTRUCTION FOR CANDIDATES FOR GRADUATION.**

The regular curriculum of instruction embraces practical exercises in the departments of Medicine, Surgery, Gynecology, and Ophthalmology and Otology, which have been mentioned in connection with the clinical lectures by the several members of the Faculty. These exercises were added to the curriculum in 1880-81, and are retained. They are designed especially for third-course students who have passed their final examinations in the elementary branches. They will be extended, however, to all candidates for graduation, as far as practicable without preventing them from attending the didactic lectures which may be going on during the hours devoted to the exercises. In addition to these practical exercises, courses of private instruction, not included in the general curriculum, designed for graduates and undergraduates, are given as follows:

**PRIVATE INSTRUCTION NOT INCLUDED IN THE REGULAR CURRICULUM.**

*Medical Diagnosis.*—Professor JANEWAY gives practical instruction in Medical Diagnosis, with special reference to Diseases of the Chest and Abdomen, to private classes. The course consists of twenty lessons, and the number of students in each class is limited to fifteen. The fee is \$20. These courses are given in both the Winter and the Spring Sessions.

Professor A. A. SMITH, assisted by Dr. W. H. KATZENBACH, gives practical instruction in Physical Diagnosis to private classes. The course consists of twenty lessons, and the number of students in each class is limited to fifteen. The fee is \$20. These courses are given in both the Winter and the Spring Sessions.

Professor DENNIS gives practical instruction in Surgical Operations on the cadaver to private classes. The course consists of fifteen lessons, and the number of students in each class is limited to four. The fee is \$15. These courses are given in both the Winter and the Spring Sessions.

*Surgical Operations.*—Professor MOTT gives practical instruction in Surgical Operations once a week, during the Session, to private classes. The number in each class is limited to ten. The fee is \$30.

*Operative Surgery and Surgical Dressings.*—Professor BRYANT

gives practical instruction to private classes in Operative Surgery and Surgical Dressings, including the treatment of Fractures and the application of the plaster-jacket and of other orthopedic apparatus and dressings. The course consists of twenty-five lessons, and the number of students in each class is limited to six. The fee is \$20. These courses are given in both the Winter and the Spring Sessions.

*Physiological Laboratory.*—Professor FLINT, Jr. receives students into the Physiological Laboratory of the College, who act as assistants during the Winter Session. The number of such students is limited to five. The fee is \$50.

*Practical Chemistry.*—The Chemical Laboratory is open to students every Saturday afternoon. Instruction is given by Professor DOREMUS with the assistance of Adjunct Professor C. A. DOREMUS. The course comprises the chemical examination of the urine in health and disease. The fee for this course is \$10. The laboratory is also open to students desiring a more complete course on Practical Chemistry, Toxicology, Physiological Chemistry, analysis of air, water, etc. For particulars, apply to Professor C. A. DOREMUS. The laboratory is open during both the Winter and the Spring Sessions and has accommodations for fifty students.

*Diseases of the Eye and Ear.*—Professor NOYES, assisted by Dr. C. S. BULL, gives practical instruction in Diseases of the Eye and Ear, at the School of Ophthalmology and Otology connected with the New York Eye and Ear Infirmary. The Winter course consists of six lessons each week, beginning November 1st and continuing until the following March. The Spring course begins March 1st and continues until the following May. The fee for either the Winter or the Spring course is \$30. The fee for the separate branches of the course is \$10 for each.

*Pathological Laboratory.*—Professor WELCH gives practical instruction in the Pathological Laboratory of the College, in Normal and Pathological Histology. The course consists of about twenty-five lessons, and the number of students in each class is limited to twelve. The fee is \$15. These courses are given in both the Winter and the Spring Sessions.

Professor ROBINSON gives practical instruction in Diseases of the Heart, Lungs, and Throat to private classes. The course consists of twelve lessons, and the number of students in each class is limited

to six. The fee is \$12. These courses are given in both the Winter and the Spring Sessions.

Professor BOSWORTH gives practical instruction in Laryngoscopy and Diseases of the Throat to private classes. The course consists of twenty-five lessons, and the number of students in each class is limited to ten. The fee is \$10. These courses are given in both the Winter and the Spring Sessions.

*Diseases of Women.*—Dr. FREDERICK A. CASTLE gives practical instruction in Diseases of the Female Genito-Urinary Organs to private classes. The course consists of twelve lessons, and the number of students in each class is limited to two, preference being given to graduates in Medicine. The fee is \$50. These courses are given in both the Winter and the Spring Sessions.\*

#### REGULATIONS AS REGARDS FEES FOR THE WINTER SESSION.

The aggregate fees for tickets to all the lectures during the Regular Winter Session, including tickets for the clinical lectures at the HOSPITALS and the College Clinics, amount to \$140. This does not include the Spring Recitation-Term. In addition to the fees for the tickets to the lectures, is a matriculation fee of \$5. The graduation fee is \$30.

The fee for the dissection-ticket is \$10. This covers all the expenses of the dissecting-room. There is no charge for subjects nor are there any incidental fees.

Students who have attended two full regular courses of lectures in other accredited medical colleges, and graduates of other accredited medical colleges, irrespective of the date of their graduation, receive all the tickets to the lectures of this College, exclusive of the matriculation and the dissection-tickets, for \$70; or they may take tickets for one or more of the subjects of Practice of Medicine, Surgery, Obstetrics, *Materia Medica* and Therapeutics, Physiology, Anatomy, and Chemistry, on payment of one half of the regular fees for such tickets. Students having attended two full regular courses of lectures in this College, or, after attendance upon one full course in this College, having *previously* attended one full course in some other accredited college, are admitted to all the lectures on payment of the

\* The private courses mentioned above are intended mainly for the benefit of practitioners and others who desire to pursue special studies, and are not included in the requirements for graduation.

matriculation fee. Graduates, in good standing, of other accredited medical colleges may receive passes or permits to attend the didactic lectures, but such passes or permits do not carry the right to apply for graduation.

Payment of fees is required in all cases, and the tickets must be taken out and paid for at the beginning of the Term. Remission of fees or deductions, and the taking of promissory notes from students, are interdicted by the by-laws of the College.

The full course of lectures, the fee for which is \$140, includes the seven principal departments of Practice of Medicine, Surgery, Obstetrics, *Materia Medica*, Physiology, Anatomy, and Chemistry, and tickets for the following special subjects: Pathological Anatomy and General Pathology, Diseases of the Nervous System, Ophthalmology and Otolaryngology, Psychological Medicine and Medical Jurisprudence, and Diseases of the Throat. The special subjects of Cutaneous and Genito-Urinary Diseases and of Orthopedic Surgery are included in the department of Surgery.

Students may take out, at their option, either the general ticket for a full course of lectures or tickets for one or more of the seven departments. The fees for the separate departments are \$20 each.

The matriculation fee of \$5 admits to all the clinical lectures delivered in the College building and in the HOSPITALS. The matriculation ticket must be taken before any of the tickets for lectures are issued.

The colleges, the diplomas and tickets of which are recognized under the provisions for reduction of fees, are regular colleges in the United States, and regular colleges in Canada and in foreign countries. The tickets or credentials for courses of lectures in foreign colleges are assimilated to the division of the curriculum of instruction into the seven departments already enumerated.

#### REGULATIONS AS REGARDS REQUIREMENTS FOR GRADUATION.

The requirements for graduation are as follows: three years' pupillage, after eighteen years of age, with a regular physician or regular physicians in good standing, inclusive of the time of attendance upon medical lectures; attendance upon two full courses of lectures, the last being in this College; certificates of at least one course of Practical

Anatomy, or Dissections, either at the BELLEVUE HOSPITAL MEDICAL COLLEGE or some accredited college empowered to confer the degree of M.D.; proper testimonials of character; and a satisfactory examination in each of the seven departments of instruction; *viz.*, Practice of Medicine, Surgery, Obstetrics, Materia Medica and Therapeutics, Physiology, Anatomy, and Chemistry. The examinations upon Practice of Medicine and Surgery include Diseases of the Nervous System, Pathological Anatomy, Ophthalmology, and Diseases of the Skin. Two full courses of lectures are absolutely required, and no period of practice is taken as an equivalent for one course. The candidate must be twenty-one years of age.

To prevent any misunderstanding with regard to the requirements for graduation, the Faculty desire to state that the only courses of lectures recognized are those taken at regularly organized colleges empowered to confer the degree of M.D., the courses embracing Practice of Medicine, Surgery, Obstetrics, Materia Medica and Therapeutics, Physiology, Anatomy, and Chemistry. The tickets and diplomas of Eclectic, Homoeopathic, or Botanic colleges, or colleges devoted to any peculiar system of medicine, are considered irregular and will not be recognized under any circumstances. Certificates from preceptors who assume to be practitioners of any peculiar system of medicine, or who advertise, thus violating the code of ethics adopted by the American Medical Association, will not be received under any circumstances. The three years of study are required by the charter of the College.

There are three regular examinations for the degree: one at the close of the Winter Session, one at the close of the Spring Session, and one during the first week in October. Candidates who have complied with all the requirements may present themselves at either of these examinations, but they will not be examined at any other time. Certificates of study must be filed, and the graduation fee paid, before the examinations in June and October. The June and October examinations are exclusively for the benefit of those students who have attended the courses of lectures required, the last course being at this College, but whose time of study does not expire until the Summer or Fall.

Graduates of other accredited colleges are examined in all the departments, the same as undergraduates, and must fulfil all of the

requirements demanded of undergraduates. The Faculty will not grant a degree to any graduate of three or more years' standing who does not exhibit to the Secretary a certificate of membership in some Medical Society entitled to representation in the American Medical Association. This rule is invariable. Candidates are expected to matriculate, to take out tickets for the Winter Session, to have attended lectures during the Session, and to pay the graduation fee of \$30.

#### SPECIAL EXAMINATIONS FOR THIRD-COURSE STUDENTS.

Students who have taken graded courses at other accredited medical colleges, and who present certificates from such colleges of having passed their examinations in any or all of the subjects of Materia Medica and Therapeutics, Physiology, Anatomy, and Chemistry, may be examined at the close of the Session upon those subjects only in which they have not already passed. This provision is for the purpose of enabling third-course students, who have passed their primary examinations at other colleges, to devote their attention specially, during their third course, to the practical departments; but such students must take out a full course of lectures, according to the published requirements of the College as regards fees.

#### SPECIAL EXAMINATIONS IN THE ELEMENTARY DEPARTMENTS (PRIMARY EXAMINATIONS).

Students who have attended two full Winter courses of lectures may be examined upon Materia Medica and Therapeutics, Physiology, Anatomy, and Chemistry, at the end of the second course; and, if they be successful in these examinations, they will be examined at the end of the third course upon Practice of Medicine, Surgery, and Obstetrics only. Candidates for the primary examination will be required to pay one half of the graduation fee. The primary examinations are held at the close of the Winter Session only. The certificates of study and the remainder of the graduation fee are to be handed in to the Secretary at the regular time before the final examination. Students who have passed the primary examinations are required to attend another full course of lectures before they can be admitted to their final examinations. Students who desire to graduate by passing the primary examination, and afterward the final examination upon the three practical departments, must therefore attend three full courses of lectures.

## SPECIAL MATRICULATION EXAMINATION.

The diploma of the BELLEVUE HOSPITAL MEDICAL COLLEGE has been officially recognized by the Royal College of Surgeons, England, for those who have passed a regular matriculating examination in Classics, Mathematics, etc., at some college recognized in England. This special matriculating examination is optional with the student, and will be given by the Faculty to all who desire it, before they have attended their first course of lectures. It cannot be given to graduates or to those who have already attended medical lectures in this or any other medical college, as the examination is regarded as preparatory to the study of medicine. The subjects for the matriculation examination are as follows :

English Language, including Grammar and Composition. Arithmetic, including Vulgar and Decimal Fractions. Algebra, including Simple Equations. Geometry, First Two Books of Euclid. Latin Translation and Grammar. In addition to the above, one of the following optional studies is required ; Greek, French, German, or Natural Philosophy, including Mechanics, Hydrostatics, and Pneumatics. Text-books : Latin—Cæsar (De Bello Gallico), first two books ; Natural Philosophy—Peck's Ganot, or Parker's Philosophy ; Greek—First Chapter of St. John's Gospel ; French—First Chapter of Télémaque, or Charles XII ; German—Adler's Reader, 1st part.

For those who have passed the above examination before attending their first course of lectures, the diplomas and the tickets of the College are recognized by the Royal College of Surgeons of England. The examination is not required of those who have already passed a matriculating examination at a medical college or a university recognized in England.

This special matriculation examination is necessary for those only who expect to present their tickets or diplomas for recognition in Great Britain. Students who desire this examination must hand in their names to the Secretary within the first two weeks of the Regular Term.

## SPRING SESSION—RECITATIONS AND LECTURES.

The Spring Session consists of a single term beginning in the latter part of March and ending about the middle of June. The recitations are under the direction of Dr. H. GOLDTHWAITE, and Professors

DENNIS, WELCH, and C. A. DOREMUS. The fee for the recitations and lectures is \$40. The matriculation-ticket (\$5) must be taken before the ticket for the Spring Session is issued, and this ticket is valid for the ensuing Winter Session. A dissection-ticket (\$10) taken during the Spring Session is also valid for the ensuing Winter Session. The dissecting-room remains open until about the first of May.

*Recitations.*—In the organization of the Recitation Class, the students are divided into Juniors and Seniors. The studies for the Junior Class embrace *Materia Medica*, *Physiology*, *Anatomy*, and *Chemistry* ; and the Seniors are examined upon *Practice of Medicine*, *Surgery*, *Obstetrics*, and *Pathological Anatomy*.

*Microscopical Examination of Urine.*—The members of the Junior Class receive a thorough practical course upon this subject, in the Pathological Laboratory of the College, under the direction of Professor WELCH.

*Surgical Operations upon the Cadaver.*—The members of the Senior Class receive a full course of *Operative Surgery*, in which they are required to perform the most important operations in *Surgery* upon the cadaver, under the direction of Professor DENNIS.

*Operative Midwifery and Gynecology.*—The members of the Senior Class are instructed practically, in connection with the recitations upon *Gynecology*, in the most important operations in *Midwifery* and *Gynecology*, by Dr. GOLDTHWAITE, including the use of *Obstetrical instruments*, the introduction of pessaries, etc.

*Post-Mortem Examinations.*—The members of the Senior Class are also instructed in the manner of making autopsies, and are required to make *post-mortem* examinations, under the direction of Professor WELCH.

*Anatomical Demonstrations.*—The dissecting-room is open until about the first of May or as much longer as the weather will permit. For those who took the dissection-ticket for the Session of 1883, the following demonstrations were made, three days in each week, by the Demonstrators of Anatomy, Professors DENNIS and WELCH, and the Assistant Demonstrators, Drs. J. E. ALLEN, J. B. ISHAM, C. G. BULL, and H. M. SILVER :

The Bladder and Urethra. The Eye. The Ear. The Anatomy of Hernia. The Reflections of the Peritoneum. The Contents of the Thoracic Cavity. The Contents of the Abdominal Cavity. The

*such letters are answered in this circular as definitely as it is possible to reply to them in writing; so that letters with regard to requirements for attendance and graduation can hardly elicit any additional information. No variation is ever made from the terms of the circular.*

No previous reading or study of Medicine is absolutely required before entering the College. Students may enter the College either at the beginning of the Spring Session in March, which is recommended in preference to the Fall, or at the beginning of the Regular Session in September.

*Appointments in the Resident Staff of the Bellevue Hospital.*—The College is entitled to two appointments each half-year in the Resident Staff of the BELLEVUE HOSPITAL. The term of service in the Hospital, which is required, is as follows: Twelve months as junior and senior assistant, during which time board is to be obtained out of the Hospital; and six months in the Hospital, when board, lodging, and washing are furnished in compensation for services. These appointments are offered by the Faculty to *undergraduates* who are candidates for the degree of M.D., as rewards for superior scholarship. Competitors, when they register as candidates for graduation, are required to register also as candidates for Hospital appointment. Of these candidates, the first two, in order of excellence, will be assigned to duty in the Hospital in April following the examination, and the first will have the right of election between the medical and the surgical services; the third and fourth will be assigned to duty in the following October, and the third will have the right of election between the medical and the surgical services.

*Appointments in the Resident Staff of the Charity Hospital.*—The Resident Staff at the CHARITY HOSPITAL on Blackwell's Island consists of twelve Physicians and Surgeons. These are appointed semi-annually, after competitive examinations by a Committee from the Medical Board of the CHARITY HOSPITAL. These examinations take place from the fifteenth to the twentieth of March and September of each year. To be entitled to appear before the Committee, applicants must be either graduates of a regular medical college of New York City or within six months of graduation. The term of service in the CHARITY HOSPITAL is eighteen months: six months as junior assistant, during which time board is to be obtained out of the Hospital; and twelve months in the Hospital, under the same

Perineum. The Pharynx, Larynx, and Trachea. The Regional Anatomy of the Neck. Other Surgical Spaces. The Ligaments of the Joints. The Nerve Plexuses. Demonstrations of Specimens showing the Collateral Circulations after the Ligation of Arteries. Frozen Sections of the Body. The Cerebral Membranes and Sinuses. The Brain. The Spinal Cord. Cranial Topography. The Bladder and Urethra.

*Lectures.*—During the Spring Session, clinical lectures are delivered in the BELLEVUE HOSPITAL, the College building (from the Out-door Department), and the New York Eye Infirmary. The Faculty have also established special courses of didactic lectures, which are free to all matriculates of the College.

#### FACULTY FOR THE SPRING SESSION.

FREDERICK A. CASTLE, M.D., *Lecturer on Pharmacology.*

WILLIAM H. WELCH, M.D., *Lecturer on Pathological Histology.*

T. HERRING BURCHARD, M.D., *Lecturer on Surgical Emergencies.*

CHARLES S. BULL, M.D., *Lecturer on Ophthalmology and Otology.*

LEROY MILTON YALE, M.D., *Lecturer on Diseases of the Joints.*

The following private courses, held during the Winter, are continued during the Spring Session: Professor JANEWAY, Medical Diagnosis; Professor A. A. SMITH, Physical Diagnosis; Professor DENNIS, Operations on the Cadaver; Professor BRVANT, Operative Surgery and Surgical Dressings; Professor NOYES, Diseases of the Eye and Ear; Professor WELCH, Normal and Pathological Histology; Professor ROBINSON, Diseases of the Heart, Lungs, and Throat; Professor BOSWORTH, Laryngoscopy and Diseases of the Throat; Professor C. A. DOREMUS, Medical Chemistry; Dr. CASTLE, Diseases of Women. (See pages 10, 11, and 12.) These courses are for the benefit of practitioners and others who do not follow the regular curriculum, and members of the recitation classes who desire to pursue special studies not included in the regular course of instruction.

#### MISCELLANEOUS INFORMATION.

*The items of information under this head have been prepared after a careful analysis of the letters of inquiry received from students, preceptors, and others during several years. All questions contained in*

conditions as in BELLEVUE HOSPITAL. There are usually six vacancies at each semi-annual examination. The Chairman of the Examining Committee is JOSEPH W. HOWE, M.D., 38 West Twenty-fourth Street.

*Other Hospital Appointments.*—In addition to those in the BELLEVUE and the CHARITY HOSPITALS, positions in the following institutions are open to competition by students and graduates of the college: New York Hospital, Infant's Hospital, St. Luke's Hospital, St. Vincent's Hospital, St. Francis' Hospital, Mount Sinai Hospital, and Roosevelt Hospital.

*Expenses of Living in New York, etc.*—The expenses of living in the city of New York will, of course, vary according to the views and habits of students. The necessary expenses need not exceed those in the smaller cities or in most large villages. At the present time, good board, including lodging, fire, and light, may be had, at a convenient distance from the College, at from \$4.50 to \$7 per week. Pains are taken to provide a list of boarding-houses in the vicinity of BELLEVUE HOSPITAL to suit the wishes and means of students; and the Janitor is prepared to secure satisfactory accommodations, without any delay, for those who have matriculated at the College. BELLEVUE HOSPITAL is situated on the East River, between Twenty-sixth and Twenty-eighth streets. In coming to the Hospital from the lower part of the city, the most convenient mode is to take one of the street-cars, passing every three or four minutes, either on the Second, Third, or Fourth Avenue, getting out at Twenty-sixth Street. The distance from either of these avenues to the Hospital is short. A line of street-cars leaving the Grand Central Depot passes the BELLEVUE HOSPITAL. The entrance to the Hospital is on Twenty-sixth Street, near the East River. Students and others coming to the College should enquire at the gate of BELLEVUE HOSPITAL for Mr. J. V. STANDISH, Janitor of the BELLEVUE HOSPITAL MEDICAL COLLEGE. Members of the class who receive remittances in the form of Post-office money-orders will save trouble if they direct the orders to be made payable at Station F, New York City, this station being but a short distance from the College.

No variation is made, under any circumstances, from the established fees of the College.

The requirements for graduation are rigidly adhered to, no hon-

orary degrees are conferred, and no degree is ever conferred except after a full personal examination of the candidate, according to the published requirements of the College.

There are no positions in or about the College or the Hospitals available to students except positions on the Staffs of the Hospitals. The conditions of these appointments are fully given under the head of "Appointments in the Resident Staff at the BELLEVUE and the CHARITY HOSPITALS."

Courses of lectures are recognized by the College with reference to graduation or the adjustment of fees, solely with regard to the subjects taught and not the length of the course. The courses of lectures at certain colleges, for example, which have a continuous session of nine months, are recognized each as equivalent to but one course, although the length of the course at the BELLEVUE HOSPITAL MEDICAL COLLEGE is six months.

The courses of lectures of other colleges recognized with reference to graduation or adjustment of fees are the regular sessions of such colleges, and not preparatory or intermediate courses, which latter are reckoned only as time of study.

The Spring Session of the College is not counted as one of the two regular courses required for graduation, and is reckoned only as time of study.

Attendance upon the recitations of the Spring Session with attendance upon the Winter Session either immediately preceding or following, is reckoned as a year of study and will be certified to as such by the Secretary of the Faculty. This constitutes a full Collegiate Year. Students taking these two courses are not required to have the certificate of a private preceptor for the time thus spent at the College.

It is contrary to law to remove or to send from the city any subject or any part of a subject for dissection.

There are no regular lectures or clinics and there is no systematic instruction during the months of July and August; and students are not advised to come to the College before the first of September.

The diplomas of the College issued from 1862 to 1882, inclusive, are in Latin. The diplomas dated in 1883, and thereafter, are in English.

Printed copies of the diploma of the College, designed for regis-

tration in the State of Pennsylvania, will be furnished to Alumni residing in Pennsylvania, on application to the Secretary.

The valedictory address by a member of the graduating class will be omitted at and after the annual commencement of 1884.

Communications relating to business of the College should be addressed to the Secretary of the Faculty, Professor AUSTIN FLINT, JR., BELLEVUE HOSPITAL MEDICAL COLLEGE, New York City.

**NOTICE TO ALUMNI.**

For several months past, a second decennial revision of the catalogue of all the graduates of the Bellevue Hospital Medical College has been in course of preparation, and circulars requesting the needed information have been mailed to all alumni whose addresses could be ascertained. Many answers have been received, but there still remains a large number yet to be heard from. It is therefore earnestly desired, that every alumnus, who has not already done so, will send at once to the Historian of the Alumni Association, Dr. F. A. CASTLE, 102 East 57th St., New York City, any information concerning himself, of the following nature:

1. Name in full;
2. Year of Graduation;
3. Post-office Address;
4. Degrees (such as A. B., A. M., etc.), received before or since graduation, with date, and name of institution;
5. Army or Navy Appointments, with dates, etc.;
6. Professorships or Lectureships;
7. Membership in Societies;
8. Titles of Books, Papers, etc., published, with date and place of publication;
9. Names of alumni known to be deceased, and addresses of persons who can furnish particulars.

G. F. PUTNAM'S SONS, PRINTERS, NEW YORK.

**LIST OF TEXT-BOOKS.**

**PRACTICE OF MEDICINE.**—FLINT'S *Practice*; FLINT'S *Clinical Medicine*; FLINT, *Manual of Precision and Abstraction*; FLINT, *on Phthisis*.  
**PRINCIPLES AND PRACTICE OF SURGERY.**—ERICSEN; BRYANT; HILLROTH.  
**ORTHOPEDIC SURGERY.**—SAVRE, *Orthopedic Surgery and Diseases of the Joints*; SAVRE, *Spinal Disease and Spinal Curvature*; SAVRE, *on Club-Foot*.  
**DISEASES OF THE GENITO-URINARY SYSTEM.**—VAN BUREN and KEYS; ROBERTS; VAN BUREN, *Diseases of the Rectum*.  
**OBSTETRICS.**—LESK.  
**DISEASES OF CHILDREN.**—SMITH.  
**MATERIA MEDICA AND THERAPEUTICS.**—WOOD'S *Materia Medica*; KINGER'S *Therapeutics*; U. S. DISPENSATORY.  
**PHYSIOLOGICAL ANATOMY.**—FREY, *Histology and Histo-Chemistry*.  
**ANATOMY.**—GRAY; WILSON; QUAIN.  
**CHEMISTRY.**—BLOOM; GREENE'S *Medical Chemistry*; NEUBAUER and VOGL, *on the Urine*; FLINT, JR., *Chemical Examination of the Urine in Disease*; TYSON, *Practical Examination of Urine*.  
**TOXICOLOGY.**—WOODMAN and TIDY; KEES.  
**DISEASES OF WOMEN.**—BARKER, *Puerperal Diseases*; THOMAS, *Diseases of Women*; EMMET, *Gynaecology*.  
**OPHTHALMOLOGY AND OTOLGY.**—NETTLESHIP; WELLS; WILLIAMS (*Diseases of the Eye*); BURNETT; POLITZER; ROOSA (*Diseases of the Ear*).  
**PSYCHOLOGICAL MEDICINE AND MEDICAL JURISPRUDENCE.**—BUCKNILL and TUKE.  
**PATHOLOGICAL ANATOMY AND HISTOLOGY.**—ORTH; CORNILL and KAVIER.  
**DISEASES OF THE SKIN.**—TILBURY FOX; DUHRING.  
**DISEASES OF THE THROAT, ETC.**—BOSWORTH; ROBINSON, *Nasal Catarrh*.

Text-Books may be obtained from the Janitor, at the College, at a reduction from the publishers' prices.

**MOTT-MEMORIAL FREE MEDICAL LIBRARY.**

This Library, founded by the widow of the late Valentine Mott, comprising over THREE THOUSAND volumes, is situated at No. 64 Madison Avenue. It contains the entire medical library of the late Professor Mott, with about eight hundred volumes contributed by Professor A. B. Mott, and various other donations. The number of volumes will be constantly increased by donations and purchases.  
 The Library is open to students of medicine and practitioners, from 10 A.M. to 10 P.M., throughout the year. Tickets may be obtained from Professor Mott, on application at No. 62 Madison Avenue, between 9 A.M. and 12 M.

The Alumni Association published, in 1872, under the auspices of the Faculty, the first decennial Catalogue of the Alumni of the College, from 1862 to 1871. This Catalogue is elegantly printed on tinted paper, bound in cloth, and will be sold at fifty cents, which is less than the actual cost of publication. Orders may be sent to the Janitor, at the College. Alumni are requested to send to the Secretary of the Association their names, addresses, public positions held, etc., for future editions.
